

Braeview Primary School is working in partnership with Grow Wellbeing, an organisation providing a range of best practise professional services to operate within our school setting and help improve the psychological well-being of our students and families.

Grow Wellbeing services include:

- Psychology
- Occupational Therapy and Assessments
- Speech Therapy and Assessments
- Therapy Assistants
- Behavioural Management Plans

These services are at no cost, all charges are provided for through the Medicare and NDIS funding arrangements.

Having mental health and wellbeing experts work within the school setting enables a variety of benefits including the development of cognitive, emotional and social skills; helping the student to improve their ability to manage in-school and at home. It enables a professional to see the issues affecting the student first hand, and increases the chances of developing and maintaining positive lifelong skills learnt through our input.

Lidia Tagliabue is Grow Wellbeing's in-school Psychologist and has been working with families and students at Braeview Primary School for two years. Lidia works very closely with key staff and her professional services support the wellbeing programs operating withing the school.

We encourage families to contact Tracey Thomson, Deputy Principal, to register your interest in these services or to discuss in more detail.

You are also welcome to contact Grow Wellbeing directly. Please use the following link to complete an online consent / referral form for a fully accredited clinician to assist you.

## **Lidia Tagliabue**

### **Psychologist**

Lidia is a psychologist who has been working with children in a school setting over the last two years. Before this, Lidia spent five years providing psychological support for disadvantaged rural communities in Tasmania.

Lidia is passionate about early intervention programs and the prevention of mental health issues to support the overall wellbeing of children and adolescents.

Lidia brings creativity and a passionate approach to working with her clients, along with a commitment to evidence-based practice.

One day soon Lidia hopes to have her animal assisted therapy training complete and bring along her beloved pooch for extra support!
